

LHS Services introduces "CLASS Plus"

With the constant pressure on time and resources, the administration and control of regular safety and plant maintenance checks including statutory inspections may become tedious and sometimes neglected. Paper based checklists require time consuming physical collection, correlation and the storage of the data. This results in a weak link in the safety life-cycle of your plant item. Likewise, operators pre-use checks, Weekly/Monthly Safety Check Audits and many more tasks that are paper based can now be replaced with **CLASS PLUS**.

Based on our 30 years' experience building and managing large Statutory Inspection and Certification databases for companies like:

- *ESB Networks*
- *Dublin Bus*
- *Airtricity Utility Solutions*
- * *Department of Defence*
- * *RTE Networks*
- * *Bord na Mona*

LHS Services is uniquely placed to understand what is required to build and maintain large databases that can deliver invaluable information to our clients. We constantly strive to add more valued features, such as equipment performance through trend analysis, etc., to our existing award winning inspection package CLASS (*Computerised Legal and Statutory Services*), used in 124 national and multinational companies.

Our latest update feature is called CLASS PLUS

CLASS Plus is a secure mobile check list application for asset management, safety checks, inspection, maintenance, audit and data collection in real-time, it does not require IT involvement in its implementation as it uses a mobile cloud platform.

CLASS PLUS can also assist Safety and other departments collect and analyse data while fulfilling legislation requirements or periodic audits of any site.

Take holistic view of every plant item.

Continued....

CLASS Plus can be use by any company to carry out all necessary periodic checks enabeling a holistic view of your plant item anytime, anywhere. The program uses mobile cloud platform and works independently of your own IT infrastructure. It allows for safety and maintenance issues to be dealt with in real-time.

Features and Benefits

Build any type of Inspection / Maintenance checklists or Audits.

1. **Access inspection forms anywhere**, any time. Instantly access the most up-to-date forms from any location. Complete inspections regardless of whether you have internet access or not. Access inspection forms on any **iOS, Android, or Windows smartphone or tablet.**
2. **Empower your team** to conduct inspections and collect detailed information anytime, anywhere.
3. **Take pictures and annotate them.** Capture photos using your devices camera, quickly snap and attach images to an inspection.
4. **Add your location information.** GPS functionality makes it easy to identify exact locations during an inspection. Drop a pin to generate an address with coordinates.
5. **Type or dictate free form notes.** Write up additional notes inside a text box by typing or using your device's microphone to dictate notes faster.
6. **Include time and date stamps.** Record date and time information to accurately capture when inspections have been done.
7. **Look up reference information.** View relevant information while inspecting. Either reference plain text, an image, or click a link to an external website.

Continued....

8. **Sign off with digital signatures.** Confirm information with sign offs and have accountability with digital signature capture.

9. **Record and track safety action items.** Create a corrective action on the spot for an issue that needs to be resolved. Assign actions to people, set the time and date and priority level for the next task.

10. **Share reports immediately.** After an inspection is complete, an instant shareable report is generated. Share with the tap of a finger. View performance and trends.

11. **Automatic syncing between mobile devices and desktop platform** provide real-time analytics dashboards. Get visibility into your productivity, compliance, accuracy and more.

12. **Reporting & Analytics.** Pinpoint issues, spot trends and take proactive measures to improve operations.

13. **Workflows,** Explore how to drive performance with actions, notifications and workflows.

Data Process Flow

The CLASS Inspection Programme has the proven capacity to deliver Safety & Efficiency and by adding CLASS Plus to your inspection of plant and equipment It allows you to make decisions on how to bring value to the bottom line and make **“Safety a Profit Opportunity”**
